

## Assembly Services

### We provide customers from different industrial sectors:

- Hydraulic and pneumatic applications including requisite directions
- Various sub-assemblies of the above-mentioned products

### Logisteel Oy's customer benefits:

- Disturbance production
- Better cost efficient
- Notable cost savings
- Optimised stock volumes
- Capability to respond the market requirements

Our organization is reacting very smooth with changes in customer situations and hopes.

We want to operate together with our customers as long-term partner, seamless in part of production and material handling process.

In our production, we have specialized in carrying out light and medium weight assembly operations. Our service comprises assemblies and deliveries of smaller and larger modules included in the customer's products, as well as related partial manufacturing and acquisitions. When necessary, we can also carry out final product testing. We can also offer our experienced and skilfully mechanics to increase customer own capacity.

Our operations comply with the ISO 9000 standard.
